Date Mailed: 03/27/2001

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the PTO processes the reply to the Notice, the PTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

**PUMPING OR MIXING SYSTEM USING A
LEVITATING MAGNETIC BEARING
RELATED SYSTEM COMPONENTS,
AND RELATED METHODS**

This application claims the benefit of the filing date of: (1) U.S. Patent Application Ser. No. 09/460,600, filed December 14, 1999; and (2) U.S. Provisional Patent Application Ser. No. 60/239,187, filed October 9, 2000.

Technical Field

The present invention relates generally to the mixing or pumping of fluids or the like and, more particularly, to a number of systems, related components, and related methods for pumping or mixing fluids using a rotating magnetic bearing levitated by a superconducting element.

Background of the Invention

Most pharmaceutical solutions and suspensions manufactured on an industrial scale require highly controlled, thorough mixing to achieve a satisfactory yield and to ensure a uniform distribution of ingredients in the final product. Agitator tanks are frequently used to complete the mixing process, but a better degree of mixing is normally achieved by using a mechanical stirrer or impeller (e.g., a set of mixing blades attached to a metal
